DETAILED ACTION

Allowable Subject Matter

1. Claims 1-26 are allowed.
2. The following is an examiner's statement of reasons for allowance:

U. S. Publication 2004/0133772 to Render is the reference closest to the claimed invention. Render discloses a method for securing a Voice over Internet Protocol (VoIP) terminal with a telephone security (TSD) device having a terminal I/O component that interfaces with a VoIP terminal, a firewall component that watches a communication session, and a network I/O component that interfaces with a network, wherein said TSD provided to watch the communication session with the VoIP terminal and determine if the communication session has ended or has been initiated. However, Render does not teach a method of operating a communications network including a firewall comprising the steps of: monitoring delays associated with the closing of ports corresponding to communications sessions following the termination of said communications sessions as indicated by session control signals; and generating an alert signal when a monitored closing delay exceeds a preselected threshold; and including all of the other limitations in the respective independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
